

# The report of diplomatic travel

## of Habilian association representatives

Habilian association

October2006

Appendix:

1. Public report
2. Report of meeting Director of UNHCR's Middle East affairs
3. Report of meeting Director of ICRC's Middle East affairs
4. Meeting and presentation of report to Mr. Martin Scheinin, special rapporteur of United Nations in terrorism issue
5. Meeting Ms. Rachel Leatham, senior member of US foreign ministry delegation
6. Meeting Mr. Robert Last, member of Britain foreign ministry delegation
7. Meeting Mr. Boris Angelson, member of "Reporters Without Borders" organization
8. Meeting professor Charles Gloves

## Public report

On the eve of the first anniversary of Habilian association, numbers of Habilian association representatives took tripe to European place of UN in order to attendance in assembly of Human Rights Council, meeting with supreme officials of world wide Red Cross and officials of HCR(high commission for refugee).

In this traveling, Mr. Seyed Javad Hasheminejad, secretary general, and Mr. Mahdi Mollazadeh, director of legal committee, got to Geneva as representative of 16000 Iranian terrorism victim's families and performed significant meetings and negotiations with Mr. Pierre-Andre Junod, director of ICRC' Middle East affairs, and Mr. Hamdi Bokhari, director of UNHCR's Middle East affairs.

Deputations of association also attended in assembly of Human Rights and in there furthermore, met Ms. Louis Arbor, senior Commissar of UN Human Rights, and members of country's delegation, independent characters that are active in field of human rights and non-governmental groups and also explained function of association and role of terrorist groups, especially Mujahedeen-e Khalq terrorist group, against human rights in Iran.

Most significant meetings of association's deputation in this travel:  
Meeting and presentation of report to Mr. Martin Scheinin, special rapporteur of united nations in terrorism issue, meeting and consultation with Ms. Rachel Leatham, senior member of US foreign ministry delegation, meeting and talk with Mr. Robert Last, member of Britain and Ireland foreign ministry delegation, meeting professor Charles Groves, of interfaith international and active in field of human rights, and meeting Boris Angelson, representative of "Reporters Without Border" organization.

### 3 conditions for granting refugee status to Mujahedeen

The report of meeting with Director of UNHCR's Middle East Affairs:

Habilian association Secretary-General met and talked to Mr. Hamdi Bokhari, Director of UNHCR's Middle East Affairs, in seat of this organization in Geneva on Friday morning 2006-09-29.

In this meeting Mr. Seyed Javad Hasheminejad, with appreciation of humanitarian activities of this institution, explained the association's aims and activities and delivered the documents and cultural and investigative productions of association to him that use them for survey and holding in commission.

Mr. Hasheminejad said to Mr. Bokhary:

"We appreciated the role and cooperation of Red Cross in help to return of MKO's members, who have requested to return their country, in a meeting with one of Red Cross authorities and also thank you and UN to make situation for penitent people of organization to return to their families.

Our group has been formed to struggle with terrorism routs and undoubtedly, one of its ways is remove of MKO terrorist base.

Some bodies claimed that should grant refugee status to Camp Ashraf but in our opinion, it cause to improve terrorism culture. We should make conditions as soon as possible that organization's members return to their country. About 1500 of members have been returning to Iran during last 15 years and during recent one or two years about 500 persons from total of 4000 Camp Ashraf members, have separated. The fact is that 10 percent of them are criminal and others, according to Iran officials' remarks, can return to join their families. Although our group was formed to meet hurt families rights from terrorism and follow terrorist crimes but because we also dealing with MKO issue, about 100 of members families contacted us and demanded to help them to return of their children during a last year. I transfer their message and concern to UNHCR. These concerns have increased specially after publish the reports of some sources, such as Human Rights Watch organization, based on torture and imprison of organization members about persons, who demanded to return the country.

I hope some conditions will be prepared for families that can enter Camp to visit their children without organization's pressure and supervision.

But now, our aim of this meeting is for reveal some rumors about propagandas of Mujahedeen-e Khalq based on that UNHCR have a role in their present status and also know the commission's future policy in relation to them".

After that Mr. Hamdi Bokhari praised association's annual functions and encouraged the members to continue and specially cooperation with commission.

Mr. Bokhari also appreciated and thanked Habilian association because of their attention to the organization members and their return and also that tried to visit and contact them; and at the end of meeting, delivered him different documents and evidences about organization and terror victims.

Director of UNHCR's Middle East Affairs announced that:

"We don't have agency, like Red Cross, in Iraq and I work with numbers of our assistances on this issue in here, we accepted that you come and we listen to all things. This is a great process and we are bound to grant refugee status to asylum seekers and our activities are also peaceful, but high commission grant refugee status just to citizenry but Ashraf is a belligerent city and we don't give refugee to warriors. This method of us is for the entire world; at first they should give their request and the request should be personal not governmental and not be related to any organization but they don't have these conditions in Ashraf.

These are official militants and being limited protected under Geneva Convention until determination of their status.

There is no difference before and after the war, Saddam might be gave them refugee but now is difference and related to Iraqi government that has given refugee to them. They are under support of US after the war and we didn't have any interference in this case.

The members of MKO can get refugee status under three conditions:

1. Cutting ties with Mujahedeen-e Khalq organization
2. Have not relation with any military and terrorist organization
3. Giving pledge not to return to previous status, it means that Red Cross should guarantee that they don't return to previous status and there not be any threat for countries.

We were also informed about return of most of them but don't have any information about numbers of them, we talked about their return with territory countries, like Iran government that if members of this group exit and have conditions, we can help them.

We don't have any agency in Iraq now, we are negotiating with US. Some of them came personally and gave the request and we are granting refugee status to them, in fact they separated of this group and their refugee is personal and we also speak about them not their organization.

They also themselves like to return but not to Iran and it'll also change in future.

Your group can be fruit bearing in Iran, we also have close relation with Red Cross because they also try that their members return to their houses.

Your group can help us and Red Cross to return of them, we don't have access to Iraq's Red Cross. If they want to return, Red Cross should guarantee it that if they return to Iran, would not be changed to their previous status because if they are deported from Iraq, we wouldn't know how should help them.

We have a great office in Iran and you can contact and help them to return of them. UN family also likes that terrorism being ended and the world become safe from their activities".

"Do you know why organization members burned themselves and how people they are?" Mr. Bokhary asked in finally.

"They are unaware and ignorant people that became puppet of criminal leaders and the leaders make them do these actions to win international bodies' attention and put pressure on humanist institutions.

Claim of granting refugee and some things like that by UN or Red Cross is also a trap that this organization tries to put the international bodies against Iraqi government and use this trap for several". Mr. Hasheminejad replied.

## We don't solve political issue of any group

The report of meeting Director of ICRC's Middle East affairs:

Mr. Seyed Javad Hasheminejad, General Secretary of Habilian association, met and talked to Mr. Pierre-Andre Junod, Director of ICRC's Middle East affairs, in seat of this organization in Switzerland. At the beginning of this meeting, Mr. Hasheminejad appreciated authorities of Red Cross's presence and after that presented a report of association's function and also list of 16000 Iranians, who assassinated by Mujahedeen-e Khalq.

"Fortunately, you know terrorism issue and crimes, which happened by cruel and murderer terrorists such as Mujahedeen-e Khalq Organization (MKO). Mr. Hasheminejad said to Mr. Junod.

Almost majority of terrorist actions that happened in Iran, are because of their illegal presence in Iraq, especially MKO that was formally part of Saddam army and perfectly acted through baathist party's opinions in killing Iraqi people and assassinate Iranian people.

We were informed all events and especially some things about Mujahedeen-e Khalq terrorist group in Iraq by the US attack to this country. MKO claimed that stay and not stay in Iraq doesn't refer to Iraqi government and they are political refugee by according to convention with America and Red Cross world wide and also Red Cross and America granted political refugee status to them under forth Geneva Convention.

Now we have several questions that do you accept such claim about Red Cross and interference of you in Camp Ashraf, if you have granted refugee status to them, who would be responsible for their crimes?

How long is this refugee? By according to legal Iraqi government that has been established awhile, can this refugee be legal by you?

Can this organization be under forth Geneva Conventions? If some crimes happened in our country and however belong to them and also by according to this that Iraqi authorities are opponent with the presence of this terrorist organization in their land, who will be responsible for these crimes?

Certainly you are noticed that some times ago, a member of this organization burned himself in Camp Ashraf, such action had happened some years ago in Paris, these two events show that whenever the criminal and murderer leaders of this organization want to win world's attention, make their members burn themselves or do other criminal actions.

If these criminal and fascist leader are put on trial in a safe place, where was prepared by US and Red Cross for them, and they force their 3000 members, who have to stay there under their tortures, to burned themselves, who will be responsible?

In continue, Mr. Pierre Andre Junod said:

“I’ so glad to meet you and so sorry for some things that have happened for you. We are a humanitarian organization and not a politician; we know the status of MKO, which is a political group, and we don’t have any relation with politic. Nobody should expect us to solve the political issues”.

“Our organization has ten representatives in region that five of them have been killed in this war and we don’t have any representative to send there”.

He added.

He pointed that they haven’t gone there since 2003 because of unsafe and to maintenance of their assistances life, and announced:

“We can’t go there, not because of Geneva Convention or some else, because US support them lonely and we don’t have any role in this issue”.

Junod added: “the protection, which is in convention, is just for persons not groups and also just governments can grant refugee status and we aren’t a government to granting refugee status or not, it refer to Iraqi government or UN High Commission.

There is a discussion in international law that such organization should be supported or not? This issue also refers to America and Iraqi government and not Red Cross.

What I said to you, also say to Iraq and America and Mujahedeen that we can't grant refugee status to any body. I'm so glad to meet you and I hope have good cooperation with each other".

In final, Mr. Hasheminejad stressed that:

" we want to extirpate terrorism and terrorist thought from our country and certainly the first step is help to innocent Mujahedeen to return and join their family and so as you know, after declaration of Iran that who is not criminal is in safe, 300 members returned to country and believe that if they not be under torture and pressure of organization, majority of them would return to their country and join their compatriots and we are ready to any help and have cooperation with you in this field.

It's clear that responsible of that disaster, which was pointed by me, is who has supported them and their base and allowed them to promote and improve their terrorist thoughts and propagandas.

Our group could gather a lot of documents and evidences about their crimes and activities during one year. We presented these documents to representatives of western country and other groups, which were met in meetings of Human Rights Council in your country, and they promised to cooperate with us".

"Mujahedeen organization several times has wanted to put the international organizations against governments and now also try to put Red Cross against Iraqi government to stay and maintenance of their base and organization, but fortunately won't happen by the help of you.

## Report of terrorism status in Iran

Meets and presents the report of terrorism status to Mr. Martin Scheinin, UN special rapporteur in terrorism affairs

Representatives of Habilian association attended to a meeting about report of terrorism by Mr. Scheinin on Thursday 2006-9-26 at 10am and after that “case of terrorism in Iran” was reported to him by Habilian association Secretary General.

Mr. Hasheminejad delivered documents and evidences about terrorism in Iran and also won his attention to some issues and said:

“When speak about terrorism in UN, there is a little attention to perspectives of terrorist crimes and today also unfortunately, countries are promoting and developing terrorism and terrorism culture instate of struggle to it.

Our country is one of terrorism victims; status of victims in Iran is too terrible and grievous but unfortunately, Mujahedeen-e Khalq terrorist group, which is responsible for these murders and was known as a terrorist group by western countries specially US, can stay and have base and media in Iraq under US support and when this organization has presence and activity in European countries specially in France, where is the place of this group’s criminal leaders, it seems that speak about double approach in struggle with terrorism is simplistic and these countries are developing terrorism and publishing terrorism culture.

When murder of 16000 victims, who were assassinated without any opinion, is ignored and powerful countries use them as tools to pressure other countries like Iran and exploit terrorists to access their aims instate of destroyed their rout, so we should say that they are associate in their crimes directly and indirectly.

Majority of Mujahedeen's massacre happened when their leaders were stand in western countries specially in France and also now they are a group in Iraq under support of America and a group in France under activity.

On the other hand of these protections of Mujahedeen-e Khalq terrorist group, the humanity and humanity rights perspectives of 16000 families' victims of Mujahedeen organization crimes have been ignored and international and humanity rights bodies haven't considered on their suffering for more years.

We gathered many documents about forty years activity of Mujahedeen-e Khalq organization, which was formed to assassination and murder and is beholden for its life to countries like America, that hopes use them in your investigations and we also be associate in struggle with terrorism.

"we had been dealing with governmental issues but because we work in field of struggle with terrorism, so your documents and evidences are useful for us and with attention to this that type of your activity is as the same as us, so it caused that we work with each other in future. Mr. Martin Scheinin replied at the end of Mr. Hasheminejad remarks.

At the end of this meeting, Mr. Scheinin was invited to Iran to attend in an international conference about struggle against terrorism, which will be held by Habiliaan association on December in Tehran; and Mr. Scheinin promised that will try to attend in this conference.

## Criticism of America's double policy in struggle with terrorism

Meeting Ms. Rachel Leatham, senior member of US foreign ministry delegation

Representatives of Habilian association explained that how and why this association has been formed and expressed what they have done during one year of their work and even explained about terrorist events and issues in Iran, in meeting with Ms. Rachel Leatham on Tuesday 2006-9-26. Among of this meeting, Mr. Hasheminejad talked to Ms. Leatham that you can follow in below:

Mr. Hasheminejad:

“Thank you for giving time to us, everyday as you know, crimes and massacres happen in all around the world because of terrorism.

Our country is one of its victims. We are families and children of some victims, who were killed by one of the most criminal terrorist group, Mujahedeen-e Khalq, and we have formed a group to explain extended perspectives of their crimes and disasters and gathered all documents and evidences of this organization's terrorist activities".

Ms. Rachel Leatham:

"I'm also so glad to talk to you and so sorry to these terrorist events that happened in your country and caused to kill some innocent people".

Mr. Hasheminejad:

"It seemed that this dilemma would be eradicated when western countries and yours came into Middle East region; I became to glad because of this your country's move as a member of terror victims families, but unfortunately it resulted in to division and support of terrorism. Terrorist people and specially Mujahedeen-e Khalq have killed a lot of people in our country and also by according to your country foreign ministry's 1994 report, this organization have murdered thousands of innocent people and certainly you know that some of them have been of your country's citizens .

Ms. Leatham:

This group has been disarmed and limited by US and declared as terrorist groups. Do you claim that they are under our support?

Mr. Hasheminejad:

The Mujahedeen-e Khalq Organization (MKO) could stay in Iraq in spite of this country authorities and people's hate (because of their more crimes in this country), just by this reason that US supports and exploits them. This reason is the biggest one of US to support them.

Have your country divided terrorists into good and bad terrorists? Don't you think that your double behavior with murderers of our fathers caused that these criminal people find a safe place for themselves and conveniently have strong presence in US congress and European parliaments?

Why can terrorists conveniently communicate with European congresses and parliaments representatives? What is your excuse to support of them although your country declared them as terrorist group? Double behavior and contact of your country caused that MKO can send its members to Human Rights councils as cover agents and have strong presence in there.

I have some backgrounds and characteristics and speeches, which have been delivered by some of them in order to support of terror and murder and also sentence, which has been passed by Interpol to arrest and prosecution of them, that I deliver with other documents.

Ms. Leatham:

Are you willing to trial of them? Do you mean that they are put in trial in America or other country by UN?

Mr. Hasheminejad:

Our opinion is struggle with terrorism and terrorist considerations; we demand that never again young children or infants lose their fathers like us, because of some criminal people's ambitions, which caused to kill both our people and their own people.

Ms. Leatham:

You should know that your presence in this conference in order to achieving to your aim is too effective; you should try to have relation with other groups and persons and explain type of your activity.

Your country is one of our top priorities, so we are willing to reflect your subjects and documents and ask you give me all your information and documents about them now or send in future and I will reflect them to my government. I hope can have relation with you and refer your group activity and documents to related authorities.

Mr. Hasheminejad:

I appreciate your kindness; we deliver our documents and evidences that bring with ourselves and will complete them by help of you in future.

In finally, numbers of documents and evidences and some books relate to Munafeqin organization issue presented to Ms. Rachel Leatham.

## Presence of Munafeqin is dangerous for Europeans

Meeting Mr. Robert Last, member of Britain foreign ministry delegation

Members of Habilia association, in following of their meeting with members of political corps, met and talked with Mr. Robert Last and Ms. Sara Clayton on Thursday 2006-9-28. In this meeting, Mr. Mahdi Mollazadeh, official of Habilia association legal committee, after explaining aims and functions of association in one year and presenting some documents and evidences and answering to question about association's activities, said:

“Terrorism issue and speak with weapon and murder and massacre of innocents to improve political goals have been exerted since victory of Iranian people in 1979 by greedy of power and without popular support groups and caused 16000 Iranian innocent citizens such as governmental officials or ordinary people were killed.

Presence of Saddam Hussein and some European country's rules and regulations have caused that the Iranian anti-popular terrorists be under supported by them; terrorist activities have been followed by criminal leaders of terrorist groups, especially Mujahedeen-e Khalq Organization (MKO), who were and are in European countries and executed by assassination teams and squads, which have been dispatched from Camp Ashraf in Iraq.

Our people believe that should struggle with terrorism routs generally. We formed this association in order to have a share in this global struggle and help to this global movement as people, who have been hurt a lot by terrorism.

We think that when coalition forces came to region, they should have executed one of primitive and significant aims, which were declared by them, and also destroyed the terrorist bases, which were established in order to Saddam expansionist aims against neighboring countries especially Iran. Ashraf military base is a center, in where has been designed and executed a lot of crimes and a lot of people from Iran nation and Kurdish and Shiah tribes of Iraq have been killed.

Of course, we are, as children of terrorists victims, willing to open the terrorism record in Iran and we are too happy that innocent people of Camp Ashraf can join their families and hope that others people of them will can return to their country and get out of the organization's pressure, like that more than 300 of them returned during one and two years ago.

Keeping of them in Ashraf base and especially west's unconcern to their presence and distribution in Europe can be too dangerous for Europe's people.

However, the group, which has been formed to assassination and murder since 40 years ago and has performed all kinds of terrorist activities, it is possible that perform what it has performed in Iran, in Europe too.

If MKO's criminal leaders find themselves in surrounded and also their organization be in danger, so they can be dangerous for the Europe's people. Some years ago, when their leader's criminal and terrorist wife was arrested, they ordered to their members that set themselves on fire in order to win attentions.

Now you suppose that they perform some brutal actions like them or other actions, which are usually performed by terrorist groups, with Europe's people; don't they condemn the politicians, who allowed terrorists collect their group and deal with to spread violent thinks and activities in their land? So, again your country's people will be their victims like our people. Sometimes ago, some happen like that somebody set themselves on fire in France, happened in Camp Ashraf; when this organization is restricted, so try to win attentions by doing such crimes.

We collected more documents and evidence about type of function, operations and victims of this group that present you to refer to your authorities and officials.

Then, Mr. Robert Last expressed pleasure from this meeting and declared his regret to these terrorist activities, which happened for Iran's people and families of association's members by Mujahedeen-e Khalq and also added:

“Our country follows terrorism like your country and it is one of our problem; issues, which were noticed by you, were too useful for us such as list of victims and also documents and evidences about activities of terrorist groups. Both documents of their activities and their victims exactly will be significant and useful for the parts, which work in this field in England. As you know, I'm not expert in Iran issues but try to refer them to high officials and I hope have cooperation with you in future.

I think this travel, which is your first presence in Human Rights Council, can be useful for you because you had relations with different centers and especially various NGOs, which follow your opinions. I hope that never see terrorist activities neither in your country nor in other part of the world again. I am too glad to meet you and be lucky.

## The role of Medias in struggle with terrorism

Meet Mr. Boris Angelson, member of “Reporters Without Border” organization

Representatives of Habilia association, through the information dissemination and obvious transfer of news and documents of crimes that happened by terrorists in Iran, made an appointment with representative of Without Border Journalists to inform about issues of association’s activities. Mr. Boris Angelson, one of experienced journalist of without border organization, in the meeting with Habilia association representatives, pointed that because of some propagation and exaggerations against Iran by America, there are a few information about Iran and activities of Mujahedeen terrorist group.

Mr. Angelson, after considering the documents and evidences of terrorism in Iran and the explanations of association representatives, said:

“I’m too glad that meet you and your group by my presence in council; I know about Iran issues but I don’t have enough information about this aspect that you work on, I just know a little about function of Mujahedeen-e Khalq organization.

Unfortunately, some things are adopted in some politics that are unlawful. The exaggeration of America about Human right in Iran lead to make hostility between them and it is an obstacle for serious investigation on human rights issues. I believe that if there is a struggle against terrorism, it should be global and without consideration on political aspects. I am so sorry for what happened to you and your families and now listen to you eagerly”.

After that Mr. Hasheminejad, secretary general of Habiliaan association, expressed the ideas and aspects of Habiliaan association about 16000 terror victims in Iran and said:

“I am too glad to meet you; I don’t know how much you know about Iran issues. A lot of events happened in Iran after 1979 revolution of people against Shah’s dictatorial regime. As you know, when a country or people wants to get out from under the yoke of colonialists, immediately face to all kinds of invasions and plots of great powers, such as our country.

I have seen many troubles and sufferings that imposed to our people by great powers and at the top of them America, since I was teenager and our people win against Shah’s regime. We experienced several internal and external plots that if the decisive presence of our people were not in that time, it could destroy any country.

Iran passed different sanctions and also had a most extensive and long war of last century, in which we didn’t loose any part of our land by the help of our country’s men and women. Coincident with Saddam attack, terrorist group also attacked to people inside of country and killed woman, man, old and young people. Mujahedeen-e Khalq Organization (MKO) group is one of these groups that murdered all the people in any level or position.

But never dealt with this issue seriously because their actions were trough the US interests and although the name of MKO was placed in terrorist list but in global struggle against terrorism, their behaviors with this organization lead to make a safe position for them.

They were allowed to activity among parliament officials and different Medias in Europe and America, even some of their members, who are under prosecution of Interpol, are present in Human Rights Council.

Of course the MKO are present with different labels and names in Europe and America and I pointed backgrounds and functions of them such as self-immolation of some members of this organization by themselves, to some of European authorities and noticed that their presence can be dangerous for people and citizens of Europe.

Authorities of High Commission for refugee and global Red Cross declared that Ashraf Camp, in where this group is placed, has war status and they will make trouble for the people of that location and Europe.

Informing and awaking the people from function and dangers of their presence is duty of Media's members, who investigate and survey issues out of political matters.

We formed an association in order to investigate and survey aspects of this group's terrorist crimes in Iran; all of us are families of terrorism victims. We found more issues and crimes about them during our investigations. This organization performs any crimes to achieve its opinions.

There are killing of American citizens in their backgrounds and so we pointed, self-immolation of their members among people of Paris is a part of their criminal actions.

We hope that being supported by impartial Medias and aware consciences that just think about human rights.

Documents and evidences, which are about crimes of this group and who were killed by them in Iran and presented to you, were also presented in our other meetings with people, who were members of Human Rights Council, governmental or non-governmental, and they also became too glad and accepted to cooperation with us”.

In final and after Mr. Hasheminejad's speech, Mr. Boris Angelson stressed: “I'll confide these documents and evidences to others Medias and be sure that I will express this organization's crimes wherever I am and I hope we have continuous relation with each other.

## Violence-seeker don't have relation with religion

Professor Charles Groves, of interfaith international and director of religions talk in Swiss, is one of European thoughtful and theoretician that although refusing radical and violent views, he believes that mutual understanding through the talk and entente is a way to knowing religions and especially Islam and Moslems. Mr. Groves traveled to Iran last year and attended in global conference of imam Mahdi.

He has attendance in assembly of Human Rights council this year and representatives of Habilia association could meet him.

Mr. Hasheminejad after expression of pleasure to meeting Mr. Groves explained a report about association's activities and reason of their attendance in Human Rights Council and added:

“Presence of scientific eminent characters such as you in international and political bodies leads to consolation and hope for the future of humanity and cause that politicians, especially politicians of great countries, who look at global issues behind their seeking benefit glasses and by their own political view, decide and act with more consideration.

I think present age is the age of nation's awareness and again can't change their fate. As you know, our country dominated America and because of this, we are threatened by US plots; one of these plots is its supporting of terrorists.

Although the name of Mujahedeen-e Khalq Organization is in the list of global crimes and terrorists for some years but US support them because of its interests and benefits that gain by them.

I hope that saving and humanity thoughts of religions substitute for political thoughts of global violence-seeker politicians”.

Professor Charles also after appreciating Mr. Hasheminejad’s remarks and expressing some memories about Iran announced about Munafeqin terrorist group’s status:

“I know them; they didn’t have presence in Geneva in some years ago but I have seen several of them in this year that go to some of our citizens to deceive them.

Unfortunately some groups like them are militant and kill people by bombing and assassination and try to show themselves as a kind of religious thought, but violent thoughts never have relation with religions.

America isn’t honest in its struggle with terrorism and support the Mujahedeen-e Khalq because they spy for US. Some of politicians also support them by according to these cases, for example although Maryam Rajavi is a terrorist but supported by some people. However, we can’t change the world and it’s the world’s status and I also hope that the world would go through religion and intellect in a day and also I’m so glad to meet you and your presence in council and believe that you should have attended active and sooner”.
